## Mushrooms Project & Toby Tobias Remix

### "Space Mushrooms"

Cat no: EMINDS012 / Release date in the UK: July 2009

Mushrooms Project are Giorgio Giri and Marco Lentano who met back in 2003. They were joined through a love of DJing and a passion for all forms of music.

Their inspiration has come from the Idjut Boys and the Mateo & Matos duet. Pushing the boundaries of DJing they introduced themselves to using 4 turntables, which enables them to fuse together deep house, disco and funk. After making their debut in their home country of Italy they have gone onto play at various parties around Formentera and Ibiza. In the middle of the Mediterranean their Balearic approach to music fitted in perfectly with their surroundings!

In 2008 the pair had their first production signed by London's Bear Funk Records. As an established label with releases from the likes of Lindstrøm, Chicken Lips, Idjut Boys, Fabrizio Mammarella it was a promising start for Giorgio & Marco. Shortly after a new demo arrived at Electric Minds who were quick to snap up their latest EP for the label. "Space Mushrooms", "Wilkommen" and "Special Guest In The Camping" are newly created tracks with live instruments throughout. The baleranic and techy sounds provide an original and new sound for the ever growing house / nu disco scene.

As an added bonus to this package a remix from Toby Tobias has been commissioned. As a friend to the label and with consistently releasing his trademark sound on labels such as Rekids and Tiny Sticks it's great to be able to add Toby's work to this excellent EP. Check out the sounds for yourself !
